2014 Conference Line-Up

Registration begins at 8:00 am, with Opening Remarks at 8:45 am

Bill Lupo, NYS DEC Region 5 Regional Water Engineer

The NYS Stormwater Program has come a long way in the past 10 years, and Bill will touch on some of the successes and challenges in the opening remarks.

Dave Carr, RLA, Associate Principle, The LA Group

Working with HDR, Inc. at the US Military Academy at West Point, the LA Group is part of a team developing a 20-year Stormwater Management Plan for the campus. Historic buildings and grounds, as well as the rocky coastline of the Hudson River, are presenting interesting design challenges for the team as they utilize Low Impact Development Technologies based on a landscape approach.

Carol Lamb-Lafay & David Gasper, NYS DEC Central Office Stormwater General Permit Section

Staff from the NYS DEC Central Office will discuss updates to the Municipal Separate Stormwater Sewer System (MS4) permit, the Construction General Permit, and the DEC Blue Book.

John Dunkle, PE, Dunn & Sgromo Engineers, PLLC

John will present on utilizing green infrastructure techniques within municipal right-of-ways to decrease stormwater runoff and reduce street flooding during wet weather events.

John is a graduate of SUNY ESF and Syracuse University and has been practicing civil engineering since 1981. Working with both private developers and municipalities on site planning and development projects, John has prepared and reviewed SWPPPs, provided guidance for MS4s, participated with DEC in the development of the current Stormwater regulations, and conducted stormwater trainings for contractors, developers, engineers, and municipal officials. He is also a Visiting Instructor at SUNY ESF, teaching a graduate level Stormwater Management class, and has been conducting stormwater trainings across NY State with Don Lake for several years. He is also a certified CPESC instructor.

*Professional Development Hours are **pending** for Engineers & Code Enforcement*

Two half-hour breaks and buffet lunch included. Register early, space is limited!

All attendees will also receive the newly developed Rural Road Active Management Program Field Guide which outlines erosion and sediment control prevention methods and BMP's for rural roads.
